

The Radiometrics Forecast Challenge

The Radiometrics Forecast Challenge provides an opportunity to test your forecasting skills, and compete to win prizes for the most accurate high-impact weather forecasts.

You will forecast three separate weather events, including at least one winter storm in Vail, Colorado, and at least one storm in the Dallas/Ft. Worth metropolitan area. The Forecast Challenge starts on February 1, 2015, and ends no later than March 30, 2015. Since the event dates are weather dependent, you will receive e-mail notification of judged weather events and event-specific forecast criteria approximately 24 to 48 hours in advance of each event.

To compete, enter the Contest no later than midnight UTC on January 30, 2015. Complete contest rules and electronic entry form are on-line at www.radiometrics.com/wxcontest. The contest is open to all legal U.S. residents with a valid e-mail address; no purchase necessary to enter or win.¹

Prizes Include: an Apple iPad Air 2 WiFi, lift tickets to any of 11 Vail Associates ski resorts, RAOB software, and a \$250 AMEX gift card.

Prizes Sponsored by Environmental Research Services, Colorado Water Conservation Board, and Earth Networks.

¹ Contest is void where prohibited by law. Radiometrics owners, employees, interns, and contractors, and their immediate families are ineligible to participate.
